NO ESCAPE ROUTE

TRANSFORMATION

Rated by Experts & widely acclaimed by thought leaders, India Leadership Conclave Annual Affair is just not a leadership forum, it symbolizes the hopes & aspirations of the billion people reflected by the speakers at the forum. This year's theme & style is an exception to the rule, it is more interactive & analytical than a stereotype presentation. I hope to present to you something a new, fresh yet different!

We are discussing on a theme Transformation! . We know how important it is to adapt to changes & certainly we are out in business if we cant perform!

Conceived, conceptualized & developed the brand India Leadership Conclave in the year 2009. It has been a very challenging yet fruitful journey & the best part of the journey has been to think differently contrary to the general perceptions of how conclave & award ceremonies are held. I have been a rebel from the beginning & think 360 degree often to find newer approaches what the rest find madness & off-beat. The challenges are impossible, yet to me, I have enjoyed every moment of these last seven editions. This remarkable success of the brand India Leadership Conclave reaffirms the relevancy and competitiveness of Brand India's promise. In my opinion, ILC Power Brand reflects global optimism that Brand India is beginning to address the authenticity of its promise. It also reflects a desire for brand India to succeed. Whatever it takes! The Leader is born, proven, tested & admired by who's & who's of india. Thank you all for making it happen.

While there are divergent views on the nature of progress india has achieved both in the country & in the world, there is a definite unanimity, barring opposition parties natural opposition, in the fact that India is on a firm foot, the road to progress are fully work in progress post india's historic 2014 elections that swept the country & brought Narendra Modi with a thumping majority. The pace of reforms & agenda for change is clearly visible. For the first time post india's independence, there seems to be hunger for bringing a change, change in lifestyle of a billion plus population. But it is not that easy for sure. India has seen a deficit of governance and implementation. The truth is we need tangible results after a prolonged reforms paralysis & the present dispensation under the leadership of Modi knows that mere sloganeering will not work & it will lie in implementation and not just grand announcements. That would be the best way to revive faith in democracy. Therefore the theme of the much awaited leadership event in india's 8th Annual India Leadership Conclave & Indian Affairs Business Leadership Awards 2017 is aptly titled as "Transformation" & the venue for the event is in Mumbai on Friday, the 4th of August 2017 where more than 400 business leaders, social entrepreneurs, rebel leaders, writers, diplomats, film makers, women entrepreneurs, venture capitalists will assemble to witness range of hot discussions, plenary sessions & face to face talks on tough questions.

Come & be part of the momentous journey as india is transforming!. I take this oppourtunity to invite all of you to be a part of this historic 8th edition of India Leadership Conclave & Indian Affairs Business Leadership Awards 2017

ASIA'S MOST TALKED LEADERSHIP FORUM & AWARDS

Technology is disrupting the way people earn, save and spend. Clearly, Challenges of this complexity and magnitude cannot be solved by government ministries alone. They require a collaborative approach involving business and political leaders, members of civil society and academia, youth groups and social entrepreneurs. The most decisive national election result since 1984 marks a new phase in India's dramatic journey into the world's top 10 economies. Following years of slow growth and insularity, in the early 1990s India undertook structural reforms that attracted foreign investment, unlocked entrepreneurial flair and lifted millions into a burgeoning middle class
